Global work division

(Setup document)

Nikita Andrianov : GUI design

Taurius Antanevicius : ERD

Catalin Badinescu : Website static part

Together : Title page, Table of content, Agreements , Processes , Functional requirements ,

(Project Plan)

Nikita Andrianov :Project Phasing

Taurius Antanevicius : Time table, Project Risks

Catalin Badinescu : Skills table , Information table, Organization table

Together : Title page, Table of content, Current situation, Problem description, Project goal, Deliverables and non-deliverables , Constraints

Week 1

Meeting: 25 minutes.

We together came up with a logo and name of our group.

Catalin: process report.

Week 2

Meeting 30 minutes.

We did project plan version 1.

Taurius: Formal Client, Project Leader and Current Situation parts, process report.

Catalin: Problem Description and Project Goal parts.

Nikita: Deliverables and Non-Deliverables and Project Constraints parts.

Week 3

Meeting: 36 minutes.

We started to do setup document and improved project plan.

Nikita: added project phasing to the project plan, fixed some mistakes , process report.

Taurius and Catalin: did setup document version 1.

Week 4

Meeting 48 minutes.

Chilling and

Week 5

Meeting: 30 minutes.

Catalin: Static website v1

Taurius: ERD v1

Nikita: GUI v1

Together: Improved Project Plan and Setup document, Process report is updated.

Week 6

Meeting 42 minutes.

Catalin: Static Website v2

Taurius: Improved Project Plan and Setup document

Nikita: GUI v1

Together: Process report is updated.

Week 7

Meeting: 23 minutes.

Catalin: Static website v3

Taurius: ERD v2

Nikita: GUI v3

Together: Improved Project Plan and Setup document, Process report is updated.

Week 8

Meeting: 25 minutes.

Catalin: setup document (wireframes)

Nikita: C# applications design finishing

Taurius: process report, documents finishing.

Week 9

Meeting: 20 minutes.

Catalin: process document.

Nikita: research about available databases.

Taurius: setup document finishing.

Week 10

We didn't have meeting since we finished block's deliverables.

Week 11

Meeting: 15 minutes.

Catalin: connected website to database.

Taurius and Nikita: created database and connected with C# applications.

Week 12

Meeting: 22 minutes.

Taurius: did main application to be able to log in with username and password according to our database.

Nikita: working on entrance application and adjusting database according to data used in applications.

Catalin: website's generic content is replaced by meaningful content. Added demo feature of log in.

Week 13

Meeting: 27 minutes.

Nikita: made entrance application fully working with RFID.

Catalin: created sign up form, log out functionality.

Taurius: made possible to log in to main application using RFID. Made different accessibility of applications to different accounts.

Week 14

Meeting: 22 minutes.

Catalin: account setup page done.

Nikita: camping application.

Taurius: main application and visitor status.

Week 15

Meeting: 30minutes.

Catalin: adjusted web page's design, according to the client's request.

Nikita: implemented exit and ATM applications.

Taurius: implemented loan and shop applications.

Week 16

Meeting 18 minutes.

Catalin: improved javascript and php code for account setup web page.

Nikita: finished all functionalities of his developed applications.

Taurius: finished all functionalities of his developed applications.

Week 17

Meeting: 22 minutes.

Catalin: updated placeholders.

Nikita: adjusted design of applications based on client's requirements.

Taurius: adjusted more appropriate colors, pop up to applications.

Together: since website was using local database, we started and adjusted here database to be possible to work with both applications and web page.

Week 18

Meeting: 25 minutes.

Catalin: testing website's functionality.

Nikita and Taurius: connected applications and tested functionality of applications.

Week 19

Meeting 32 minutes.

Catalin: testing website's functionality.

Nikita: testing applications. (fixing bugs)

Taurius: testing applications. (fixing bugs)

Week 20

Taurius: half part of user manual. Final testing applications.

Nikita: half part of user manual. Final testing applications.

Catalin: final website's testing, fixing all bugs.

Mark justification

We think the mark we deserve is 7.0.

Strong points:

System: applications and website are working as intended. System is stable and user – friendly.

Process: group members collaborates well. The client was informed about all relevant information in time.

Weak points:

System: website has security limitations, applications' code can be improved.

Process: some mistakes were made during the process, like not sending agendas every time.

Individual reflections

Catalin:

Strong points: focused on the end product and seeing the possible problems we could face during development.

Weak points: Didn't prioritize my tasks properly.

Learning moments from the project: I learned a lot about front end and back end technologies.

Evaluation of spent effort: I think I spent the right amount of time to finish all the important tasks during the development process.

Improvements for the next project: Better planning of my tasks and plan more tasks ahead.

Taurius:

Strong points: decent knowledge in C# language.

Weak points: lack skills of doing projects.

Learning moments from project: I learned more about C# and its work with database, also a lot about how projects are developing and how to deal with different situations. (soft skills, as well).

Evaluation of spent effort: I believe I spent right amount of effort and time since I had to go through many obstacles and overcome them to contribute to project which is like right now.

Improvements for next project: plan more things ahead to prevent some mistakes, come up with more detailed plan for the future.

Nikita:

Strong points: flexibility in learning.

Weak points: time management.

Learning moments from the project: As it was my first project I learn how to work in the team . Also I got a lot of practice on C# and working with database.

Evaluation of spent effort: Could spend more, but that was enough.

Improvements for next project: I need to handle my time.
